Ohmx Announces the addition of Michael Seedman to the Board of Directors

**Evanston IL, December 16<sup>th</sup> 2009** – Ohmx Corporation, a bioelectronic detection company focused on developing a near-patient analyzer for monitoring of chronic diseases, is pleased to announce the addition of Michael Seedman to the Board of Directors.

Michael is a highly experienced entrepreneur that can provide direction and insight for the development of Ohmx's electronic analyzer and biochip. Some highlights of his eminent career are provided below:

**Michael Seedman** has more than 30 years of senior executive management, leadership & technological innovation experience. Most recently he's worked as an executive partner with SAC Private Equity Capital and Ripplewood Holdings in their technology group(s). Previously he was the founder & chairman of Entrega Technologies (acquired by Xircom), Senior Vice President & General Manager of U.S. Robotics' Personal Communications Division (acquired by 3Com Corporation), and President & CEO of Practical Peripherals, which he founded in 1981 & later sold to Hayes Microcomputer Inc.

---

### **About the Company:**

Ohmx is advancing e-Diagnostics by developing a home monitoring device that quantifies clinical biomarkers and other important disease indicators from the blood of a single finger prick. Ohmx's handheld monitoring device is electronic, low-cost, user-friendly, contains advanced communications protocols, and can be used as a near-patient analyzer in the convenience of the patient's home. Home monitoring of patient's health with Ohmx's devices will allow much more frequent transfer of information to healthcare providers and better healthcare for chronic disease patients than today's paradigm which require a visit to the doctor's office for blood testing.
