---

**About the Company:**

Ohmx is advancing e-Diagnostics by developing a home monitoring device that quantifies clinical biomarkers and other important disease indicators from the blood of a single finger prick. Ohmx’s handheld monitoring device is electronic, low-cost, user-friendly, contains advanced communications protocols, and can be used as a near-patient analyzer in the convenience of the patient’s home. Home monitoring of patient’s health with Ohmx’s devices will allow much more frequent transfer of information to healthcare providers and better healthcare for chronic disease patients than today’s paradigm which require a visit to the doctor’s office for blood testing.
